BOILER TUBES

**Reliable, even at
temperatures up to 620° C**

Power plants, waste incineration plants, the chemical and petrochemical industry, the paper industry, the sugar industry: Our boiler tubes are in heavy use everywhere. Because they can handle anything - and for a really long time.

In all standard steel grades - up to and including grades T24, T91 (type 1+2), T92 and X20 CrMoV 11-1. For gas and steam plants, we supply our seamless hot-rolled steel tubes up to a length of 23 meters.
